FINAL NEWS FROM ILEDA PROJECT

The European funded project Ileda was officialy ended on 31th of October with Final Multiplier Event held in Bulgaria.

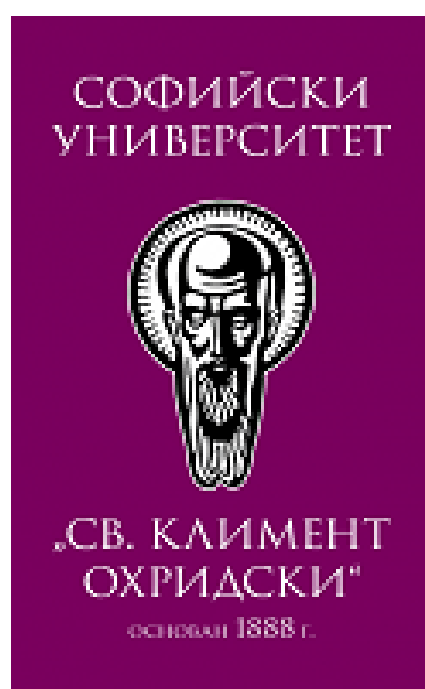

Thank you for
following us over the
past 24 months!

ILEDA Project was successfully ended with the completion of all the results as planned :

- Designed pedagogical methodologies suitable for online and blended learning
- Methodological framework for integrating learning analytics models in online and blended courses
- Developed curricula and instructional materials for 8 courses
- Developed 1 software learning analytics tool
- Collected learning analytics from 8 courses that will be shared as an open dataset for the wider audience
- Guideline and recommendations for the framework application in different educational contexts.

Sofia University organised the final Multiplier event to disseminate the results of the ILEDA project in two parts, on 26/09/2023 and 31/10/2023 respectively.

The first date was dedicated to the foreign participants, which included Researchers and University staff from all over Europe. While second one involved local participants. The overall feedback attendees shared was that they experienced an exciting and informative day that will help them better understand the importance and necessity of incorporating educational data analytics to enhance online and blended learning.

**Improving online and blended
Learning with Educational
Data Analytics**
